

ENVIRONMENTAL POLICY

BI Electrical Services Ltd, undertakes to conduct its electrical contracting and maintenance service in a manner that protects the environment in which it operates.

The company is committed to:

- Continually reviewing its contracting services, and evaluating the options for eliminating, reducing or mitigating environmental impacts.
- Preventing pollution where possible, by monitoring and assessing our activities, regularly.
- Monitoring and recording of our performance, to demonstrate our progress in achieving continuous improvement.
- Setting and reviewing environmental objectives and targets.
- Continually improving our Environmental Management System.
- Complying with all regulatory and legislative requirements.
- Ensuring that all personnel on site are aware of their responsibility regarding environmental procedures and requirements.
- Disposing of waste in accordance with environmental legislation e.g. WEEE.
- Communicating our policy to our suppliers and employees.
- Making our Environmental Policy available to the public.

This policy which provides the framework for setting and reviewing our environmental objectives and targets shall be reviewed at our Management Review meeting and updated, as required, in light of changing environmental legislation.
